

Mix it Up!

Guiding Middle School Girls to Success

Do the Math

- ✓ Try to figure out how much money you would need to start the business you described.
- ✓ Now decide what you would charge for that product or service.
- ✓ Make a shopping list of things you would need to purchase, where to find them, and how much they would probably cost. (You may want to do some research on the Internet.)
- ✓ If your business idea is to sell a service (and not a product), you probably still have things that you would need to buy, so it is good to know how much money you would need—and also how much to charge.
