

ASSESSING YOUR RESOURCES

People are your greatest resource for bringing ideas to life! So before you build your Take Action plan, think about who else you might involve.

Think about what materials you might need for your project. Your action plan or solution may change as you ASSESS YOUR RESOURCES!

What main actions must be done to make your project a reality?

1. _____

2. _____

3. _____

Who can help you with these actions? Who will contact these people and ask if they are willing to help?

Are there any organizations or groups you can invite to collaborate with on this project? Who else might care about this issue? Who will contact these groups and find out if they are willing to partner with you?

How could the people and groups you contact help this effort continue past the time you spend on it?
